Materials Physics Working Group

This is the working group on materials physics for a broad range of applications in Africa. The group is convened by three experts and may be subdivided into subgroups for a more efficient management

Subgroups

Theoretical and computational Condensed Matter Physics
Nanomaterials
Superconducting materials
Quantum Matter and topological Materials
Advanced 2D materials

Materials for optics
Magnetic Materials
Soft matter
Materials for energy
Materials for water purification
Materials for biology
Materials for quantum computing
Construction and manufacturing Materials
