Table of Contents

Central release (AFS)

Refresh the TRUNK (development) release preview

```
cd /afs/cern.ch/sw/arda/diane/install/TRUNK
svn update

cd /afs/cern.ch/sw/arda/diane/etc
./repackage_trunk
```

Create a new public release

Note: the format of tags has changed in SVN repository and is now: `DIANE-2.x` (while in CVS it was `DIANE-2-x`), dot replaced the hyphen

1. make a global tag in SVN e.g. `cd ~/diane/install/TRUNK; svn cp . svn+ssh://svn.cern.ch/reps/diane/tags/DIANE-2.x`
2. `source /afs/cern.ch/sw/arda/diane/etc/env.sh`
3. use the release script: `python /afs/cern.ch/sw/arda/diane/etc/diane-release 2.x`

To make the new release appear on the public web, edit this file:
`/afs/cern.ch/sw/arda/diane/www/include/release.php`

Post your new release message to [diane-annoucements] mailing list.
