Access Requirements

New CERN Users

- New users should follow the CERN Neutrino Platform (CENF, Yes F) registration procedure at <http://cenf.web.cern.ch/basic/registration-procedure>.
 - ◆ If you come to CERN this gives you an lxplus/linux computing account which you need to access np04 computing.
 - ◆ You need to get an external account if you do not come to CERN.

Access to NP04 resources

- Once you have an account or you have an existing linux account at CERN:
 - ◆ Request access to the `np04-t0comp-users` egroup on the CERN egroups page (<https://egroups.cern.ch>). This also adds you to the `np-comp` linux group.
 - ◆ Request access to the CENF Twiki so you can edit documentation. Go to the e-group main page (<https://egroups.cern.ch>) and subscribe to the e-group CENF-Computing .
 - ◆ Request on np04 linux account in the np04 computing cluster at EHN1. (This is not the same as the neutplatform farm.)
 - ◇ Send email to `np04-onl-admins@cernNOSPAMPLEASE.ch` from your CERN account. The list is closed to offsite emails to eliminate spam.
 - ◆ To become a daq developer with access to gitlab, JIRA, alerts, etc, subscribe to the e-group `np04-daq-dev` .
 - ◆ In order to receive notifications from the logbook subscribe to e-group: `pdsp-elog-messages` .
- For np04 cluster access from outside CERN you must go through the lxplus service first.
 - ◆ `kinit you@CERN.CH`
 - ◆ `ssh you@lxplus`
- SITE ACCESS
 - ◆ Go to <http://cern.ch/adams> and request access to EHN1-NP. Reason can be NP04 DAQ work.
- Access to the Cryostat Roof
 - ◆ Go to Impact -> Create Activity. In the 'Location' field, please use NP-Roof-NP04 and in 'Access points' use YDALC01-NP04 (se attachment). The impact should be linked automatically to the door access control.
