# CVMFSDeployment

# Introduction

To deploy CVMFS at Neutrino Computing Cluster we have installed the rmps and packages that where needed.

```
sudo yum install
https://ecsft.cern.ch/dist/cvmfs/cvmfs-release/cvmfs-release-latest.noarch.rpm
sudo yum install cvmfs cvmfs-config-default
```

We have configured the `/etc/cvmfs/default.local` in order to mount the repositories. The `default.local` has the following

```
CVMFS_REPOSITORIES=dune.opensciencegrid.org,fermilab.opensciencegrid.org
CVMFS_HTTP_PROXY="http://ca-proxy.cern.ch:3128"
```

After the configuration was done we used the command

```
cvmfs_config setup
```

and everything was setup
