Neutrino Platform Talks at International Physics Conferences and Workshops TWiki page...............1
Neutrino Platform Talks at International Physics Conferences and Workshops TWiki page

This page provides a contact point for international conference/workshop talks on Neutrino physics topics, and for general talks on the DUNE and its prototype detectors.

Talks given by NP collaborators

The CENF-Secretariat, the EP-NU Group secretariat together with the NP Computing support, maintain a database of these international conference/workshop talks. The following information is extracted from this database - only talks which have been given, or which are confirmed, are listed.

Year by year: 2017, 2018, 2019
