Using Marlin the simple way.....	1
----------------------------------	---

Using Marlin the simple way

From your shell run this script:

```
/afs/cern.ch/eng/clic/software/GetMarlin.sh
```

This will get the marlin environment file, a marlin steering file for the standard reconstruction for CLIC_ILD, and several configuration files necessary to run. You have to change the input file in the steering file.

Remember to run

```
svn update
```

regularly to keep up to date with new developments
