Facilities & Services

The Facilities and Services team of the Computing and Offline group coordinates support of computing facilities and services for the experiment/collaboration. The facilities are organized in a tiered structure. A tier consists of computer centers anywhere in the world, each providing computing and storage to the CMS computing grid. In addition to computing and storage CMS specific services are needed to process and analyse the data. Most services have a distributed architecture with the lowest layer/core/master service running at CERN.

We are Organized

The team consists of two groups, the Central Services group and the Site Support group. The Central Services group manages the VM VO-box infrastructure at CERN, the CVMFS service, DBfrontier/squid service, and coordinates central services using the VO-box infrastructure. The Site Support team coordinates use of the various grid sites, ensures that sites are operational, and manages the monitoring infrastructure.

Barry Blumenfeld	DBfrontier & Squid	at Johns Hopkins University, Maryland, USA
Chris Brew	Central Services coordination	at Rutherford Appleton Laboratory, Oxford, UK
Giuseppe Bagliesi	Facilities Services coordination	at INFN Pisa, Italy
David Dykstra	DBfrontier & Squid	at Fermilab, Illinois, USA
Maria Acosta	Site Support	at Fermilab, Illinois, USA
Bockjoo Kim	CVMFS Service and VOC backup	at University of Florida, USA
Anjad Kotobi	DBfrontier & Squid	at CERN, Switzerland
Stephan Lammel	Facilities Services coordination, Site Support	at Fermilab, Illinois, USA
Xi awei Jiang	Site Support	at CERN, Switzerland
Andrea Sciaba	SAM and HammerCloud, CERN-CMS liaison	at CERN, Switzerland
Daniel Valbuena	VOC, VO-box infrastructure and CVMFS backup	at CERN, Switzerland
