PAT Examples: MET Example

Complete:

-- Sorry this tutorial page is still under construction --

Contents

- Introduction
- How to get the code
- How to run the code
- Find out more about the details
- How to get more information
- Review status

Introduction

- Give a description of what you are going to do.
- Give an outline of the physics aspect(s) you want to highlight.
- Give a list of the information that your tutorial will provide.

How to get the code

- Give a recipe how to receive the needed code.

How to run the code

- Give a description how to compile your code.
- Give a description how to run your code.
- Give a description of the results and the interpretation.

Find out more about the details

- Give a description of the configuration of the PAT Object production (if different from the PAT defaults).
- Give a description of the configuration of your modules.
- Give a description of details and PAG specifics of your code.

How to get more information

- Add links to your PAG documentation.
- Add links to the documentation of further tools and packages (if used by your PAG).
