

Team Meeting June 4, 2013

Indico Link to meeting [↗](#)

Attending:

John, Jen, Edgar, Dorian, Xavier, Seangchan

Sara - is at another meeting

Andrew - in upgrade meeting

Alan - preparing testbed deployment and is unable to come

Personel for this week:

- Jacob on Vacation until June 16
- Andrew will be on vacation June 15-22
- Jen taking Wednesday off, will be working 1/2 days from home Thurs/Friday of this week
 - ◆ With the end of the school year Jen will be working longer day hours, and fewer evening/weekend hours over the summer.
 - ◆ John, Dorian will you be able to keep an eye on things this week?
 - ◇ Dorian can be online and will keep an eye on things
- Diego is back in Colombia and is taking the week off, will be reading e-mail on and off in the evening, will be back at work next week.
- Coming off shift: Sara
- Coming on shift: Xavier
- once people know their summer vacation plans let's get them on the schedule!
- Stenick off next week
- Xavier will update the EU shift past the end of June

Issues with Monitoring using WMStats

- problems with couch are causing ongoing issues with monitoring with WMStats

Agent issues

- vocms216 is being upgraded - all new jobs will be submitted and shouldn't have the issues of 201 & 235 because the problems we were having were due to large number of lumis and that has been addressed
- vocms85 not running many jobs, but seems OK
- vocms237 Not creating new jobs
 - ◆ not creating cleanup jobs - Edgar has asked Seangchan to look
- vocms201 & 235

Attending:

- ◆ couch has problem with documents, some of documents are bigger than it can handle unless we upgrade couch
- ◆ Diego suggested disabling monitoring so jobs can move on,
- ◆ no easy solution for right now, Seangchan has been without computer for 2 days so he will start to look at it again today
- ◆ let's put both agents in drain, finish what we have and clean up when they are done
- ◆ we will not be able to monitor workflows on these 2 machines for the time being in WMStats
 - ◇ the lower level detail page information is still there there is just no information on the front page.

WMStats

- we can not get information from dashboard to WMStats
- we would like to retire old GlobalMonitor
 - ◆ reg expression search
 - ◆ access to local queue so we can determine why workflows are not closing out
 - ◆ Seangchan is trying to put these two features in WMStats hopefully we can retire old Global Monitor after the July release
- Creation of ACDC from WMStats no longer works and that needs to get fixed again

Krista has requested help testing WMAgent on cmsrv101 with the new condor/glideinwms rpm install

- If Seanchan and I are not able to do this today, Edgar would you be able to do so late your day/early ours later this week?
 - ◆ Jen, Seangchan and Krista are going to try to meet this afternoon at 2, If we don't get things done I will let you know.

Andrew issues:

- workflows stuck in assigned on 113
 - ◆ workflows are not in the global queue Seangchan can you look at it today, if it's not fixed will reply to the e-log with what he tried so Edgar knows where to start when he comes back online
 - ◆ everything looks correctly assigned but they have been sitting in assigned for 4 hours we need to keep an eye on it today
- Dataset naming - JeanRoch is complaining about dataset naming, there are some cases where we want to write to an existing dataset ie ACDC or extend statistics for MC GENSIM
- we need to put a warning to an existing dataset Edgar will help write the script that will give a warning if we are writing to an existing dataset
