Workflow Team Meeting - Aug 14 4PM CERN time

Vidyo Link [↗](#)

- Yes, I know, it's an old link.. I just spent 15 min trying to clone it and apparently something is amiss because I can't.. but it should work just fine.

Attending

- Jen, Dave, Luis, Juan - FNAL
- Julian, Andrew and Alan - CERN
- Sean - FL

Personel

Aug 7 --> Aug 14	Joseph
Aug 14 --> Aug 21	Sara

- Please fill vacations plans for July/August for CSA14 campaign:
<https://twiki.cern.ch/twiki/bin/viewauth/CMS/CompOpsPlanningVacationSummer2014>

(Or tell Oli | CW | CP)

- Julian will take vacations September 1st to 4th
- Dave on Jury duty Tuesdays until the End of Sept

News

- quiet week.... shhhhh enjoy it... don't get too used to it.
 - ◆ second round of upgrade stuff, Dave can't find deadlines ~1 wks worth of work at FNAL
 - ◆ Jen will move the remaining upgrade ones to closed out and Dave will announce
 - ◆ MC validation campain coming up
- We should start looking for backfill to run everywhere so we can make sure everything is up and running.
- Julian will work on an issues page (like the MC one) for ReDigi. See here [↗](#)

Site support

•

Joseph's notes

- Still phantom jobs at T2_CH_CERN_HLT: look here [↗](#) vs. here [↗](#)

Agent Issues

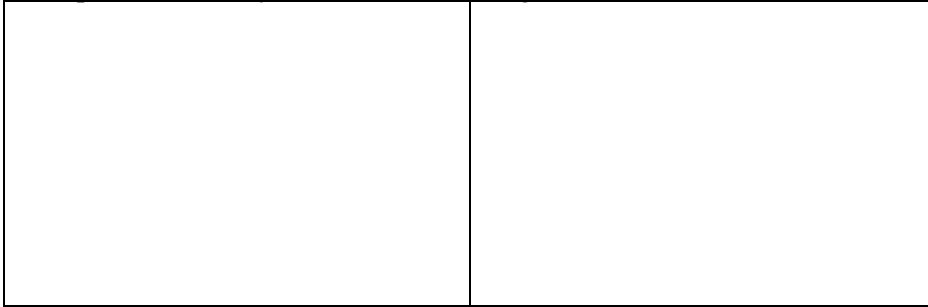

* actually behaving themselves

Redeployment plan

- vocms85 done
- vocms201 done
- next in line: vocms234 - draining
- while things are slow lets drain and upgrade everything else

Workflows

- A list to look: <https://twiki.cern.ch/twiki/bin/view/CMS/ListMC15DaysToBeCheck20140814>
- Some plot's for latency that Julian is working on:

- Interesting findings:
 - ◆ bunch of TaskChain's in closeout for 7 weeks ago?
 - ◆ 6 LHE's from May-2013 that are still in wmstats (can we clean them?)
 - ◆ 21 workflows still in acquired.

miniaod's

- a few old ones looking around, many have been caught by clones. Dave will check and see if there is anything else to do here
- There are some old upgrades that we had discussed throwing back to the developers mid-July that are still sitting around. Dave can you take care of them?

T1's summary

Rereco

- There are some Old Rereco that were a special processing that Andrew was watching. Can we please move them along?

Store Results

- Phedex request waiting: 421178 [↗](#)
- crickets

Andrew

- testing of sl6 agent is successful so far
- can someone answer this: <https://cmslogbook.cern.ch/elog/Workflow+processing/16408> [↗](#)
- why is Alan receiving e-mails from a linux user called "relval" from a virtual machine I created?
