Agent Issues

- everything up to date, agents have been stable all week
- new patches deployed to fix the way we are reading data at FNAL
- new submit scripts are being tested

Redeployment plan

- everything is up to date
- what can we do to help get things ready for SL6 agents? I know testing is happening and not fully successful.
 - ◆ RelVal and GlobalAgent machines are already SL6 and we are testing, can we use virtual machines or do we need physical machines
 - ◆ we can get virtual machins at end of the month
- do we really want to go with one team? This will be discussed further next week at Boston.
- we need to figure out what is in couch and get it to clear out properly so that when we are in full blown produciton it works

Workflows

- Things are slow, Dave is putting in some backfill to work network connections.
- lots of failures due to issues at CERN reading files

miniaod's

- next round in Sept

 - ◆ Does it have everything we need?
