Workflow Team Meeting - Oct 16 4PM CERN time

Vidyo Link ↗

Attending

- FNAL: Luis, Jen, Seanchan, Dave
- CERN : Julian, Alan, Andrew

Personel

Oct 9 -> Oct 16	Xavier
Oct 16 -> Oct 23	Sara

- Jen taking vacation day on Next Tues Oct 21

News

- wmLHE+GEN-SIM and DIGI-RECO 53x (Phys14 MC for next run) coming soon, https://hypernews.cern.ch/HyperNews/CMS/get/comp-ops/1904.html ↗ - next week???
  - Working on closeout and percentage script.
    - Julian is working on the script and thinks he has it ready for
- Possible Urgent data coming late in the week? So far all we have is a rumor that something is coming and we have no idea what!
  - Urgent upgrade, 4 new campains starting
  - copied from last week... still no sign of the urgent data
- Monitoring scripts: have to point to the global pool. Can we ignore analysis jobs?
  - scripts that count jobs in condor
  - the global pool also contains crab jobs, so when we change the scripts we should count production jobs but ignore analysis
- Ian, new US operator will be starting next week

Site support

- Sites coming out of the Morgue
  - Vienna, can we set it back ON for production?
    - perfect time to test things and see if they blow up. Go for it
  - Swierk, new T2, can we start with test workflows?
    - Julian will send backfill there

Xavier's notes

Agent Issues

Redeployment plan

- redeploying vocms216 and 234 in order to get the new WMAgent version, last redeployment cycle until we retire the machines
- any word on new SL6 machines for CERN?

- We have 4 SL6 machines at FNAL
    ◆ redeploy 2 to team backfill which use the global pool, 2 to team production
    ◆ backfill is submit 2
- Put 219 into drain, but leave submit2 alone, then continue as we are putting low priority stuff in team production then all backfill goes to backfill team,

Workflows

- slow... just wrapping up old work and new stuff dribbling in behaving itself
- stuck Redigi WF's 17199 haven't moved in a week

miniaod's

- cleared out

Rereco

- nothing... literally

Store Results

- NTR

- running smoothly - had to extend a couple workflows but that is it

SL6 testing/backfill

- slow week, Need to find bigger backfill to put in.
- Monitoring scripts are not grabbing the Production - aka SL6 WF's properly And need to be modified - Luis

Andrew

- why is footprints reopening ggus tickets: https://ggus.eu/index.php?mode=ticket_info&ticket_id=108981 ?
