# Workflow Team Meeting - Oct 1 4PM CERN, 9 FNAL time

## Vidyo Link

- <https://indico.cern.ch/event/450690/>

## Attending

- FNAL: SeangChan, Jen, Eliana, Jorge
- US: Ajit, Matteo
- CERN : Alan, Andrew
- EU:

## Personnel

- Julian is off Sept 14-Oct 2

## News - Dima

- continue to be quiet

## 3 top issues effecting production

- Stuck closeout script kept workflows from moving for several days \* issue with talking to das, sleeps were put in to keep it from overwhelming das
- elog and das issues
  - ◆ taking a long time to refresh
- das - been slow all week

## Site support - Gaston

•

## Waiting Room

•

## Morgue

•

## Workflows

- 12 black hole WF's sitting in assignment approved for a week, Matteo is taking a look

•

## Rereco

- a bunch of the last Rereco requests that got in were workflows that had 0 input events, and had 0 outputs, but there are 2 where the output number of events were smaller than the input. We need to add them . Get lumi number from dbs and compare that to lumi number out. and compare lumi out to lumi in
- We need to do closeout based on lumisections rather than events, Alan is looking at it

## Store Results

## Agent Issues

- behaving themselves

## Redeployment Plan

- all agents are in same version and 1/2 are sleeping, we should be able to cope with 110K jobs in parallel

## Andrew

- chat about why documents disappear before moving to announced
- new issues with github

## L3 discussion - Ajit, Jean-Roch, Matteo

- Did Alan find anything suspicious in the stageout code? spent several days looking at the code and couldn't find anything weird

## Opportunistic Resources - Stefan

- Ajit is experimenting with Atlas sites

## HLT

## SDSC

- out of lease time so no longer submitting here

## Automatic Assignment And Unified Software

## AOB
