# Workflow Team Meeting - Jan 21 4PM CERN, 9 FNAL time

## Vidyo Link

- <https://indico.cern.ch/event/476284/>

## Attending

- FNAL: Jen, Jorge, Gaston, Matteo, SeangChan
- US:
- CERN : Dima, JeanRoc
- Brazil - Alan

## Personnel

- Alan - Going to Brazil Dec 21-Jan 21 will be working from Brazil Jan 14-20 - SeangChan has Alan's grandma's number
- New Julian starting Feb 1
- JR in Zurich 18-20
- Jen to CERN 22-26???
- Possible training sessions Feb 8-12 - ND student Alison, Matteo, Paola/Kathrine

## News - Dima

- We need to get data done! Very serious
  - ◆ the workflows that are in assist-man and at 100% are actually 99.999 something so run recovery

Hi everyone,

I'm so sorry, my internet connection is quite unstable this afternoon. I just wanted to comment on two questions that were raised: 1) recovery procedure: as Jen said, it checks input x output and then create a special resubmission workflow for a **single** dataset, ignoring all the other output tiers. Thus, duplicates will be seen only if someone creates and assigns exactly the same json/request. 2) intermediate output for StepChain: I think the goal was to get it done for February, unfortunately due to holidays and me being vagabundo it was not accomplished. It will be done for March cmsweb.

Let me know in case you guys have any additional questions to me, I'll start replying tomorrow evening.

Cheers, Alan.

- Long term we will get more and more "monsters" running so we need to learn to manage them.

## 3 top issues effecting production

- manpower
- site issues at Ioannia and ncp
- too many files open temp cvms issue, error. Try resubmitting and see if they just run.

## Site support - Gaston

- Problems at T2\_EE\_Estonia were caused by missing kernel sources. The site should be functional now.
- We are still investigating issues with T2\_GR\_Ioannina
- T2\_UK\_SGrid\_RALPP issues were caused by overload of storage system, they've requested a reduction of DIGI-RECO workflows.
- ♦ Current Waiting Room:\* T2\_IN\_TIFR, T2\_RU\_IHEP, T2\_RU\_SINP, T2\_TH\_CUNSTDA, T2\_RU\_INR
- ♦ Current Morgue:\* T2\_PL\_Warsaw, T2\_TR\_METU, T2\_RU\_PNPI, T2\_RU\_ITEP, T2\_MY\_UPM\_BIRUNI, T2\_RU\_RRC\_KI
- ♦ Out the Waiting Room:\* T2\_ES\_IFCA, T2\_RU\_IHEP
- ♦ Sites in Waiting Room: 5  
♦ Sites in Morgue: 6

## Transfers - Jorge

- Nothing to report
- JR - please look at the transfers that are needed for the miniaodsim
  - ♦ new json's transfer team still needs to figure out how to deal with this.
  - ♦ will look at it and discuss options/solutions on the Monday Meeting

## Workflows

- filesmismatch - SeangChan will look into what is going on there.

## Rereco

\* Highest Priority

## Store Results

## Agent Issues

## Agent redeployment

- cmsrv218 and 219 are in drain (Workqueues overloaded). SeagChan will look to see if they are ready for redeployment

production SL6	
FNAL	CERN

cmmsgwms-submit1 (up)	vocms0308 (up)
cmmsgwms-submit2 (ready to redeploy)	vocms0309 (up)
cmssrv217 (up)	vocms0310 (up)
cmssrv218 (drain - overloaded)	vocms0311 (ready to redeploy)
cmssrv219 (drain - overloaded)	vocms0304 (on HLT tests)
	vocms0303 (up / highprio)

## Andrew

•

## L3 discussion - Ajit, Jean-Roch, Matteo

•

## Opportunistic Resources

## Automatic Assignment And Unified Software

- We need documentation!!!!!! Matteo is working on it, will continue to look at it.
- will be worked on when we are training in Alison

## AOB
