- Generally quiet week, getting caught up, training and testing
 - ◆ Caltech is having issues so it will
- most ACDC/clone/stuck workflows were due to sites being put into drain while the workflow was in flight. What can we do to catch this and recover faster?
 - ◆ Looks like most of them are stuck at T0_CH_CERN, Alan will attempt to clean all of these up tomorrow and then we will see what is still stuck tomorrow afternoon.
- Couch replication
- Harvesting workflows are not closing, they are not being seen so we can't close the workflows,
 - ◆ it's a missing api, Alan knows what is going on and will fix it

Site support - Gaston
