Personnel

- Jen Vacation July 25-29
- Workshop Week of Aug 16-19

News - Dima

- Workshop week, who all is going? Agenda???? Travel plans? Let's make the best use of when we are all together!

Top issues affecting production

- stuck workflows - stuck in running closed -Alan Update! New patches in, is everything OK now?
 - ◆ there was a bug in WmStats it was fixed yesterday, Alan is going through and cleaning things out through the agents, everything should be moving again by tomorrow.
 - ◆ need to go through the workflows sitting in acquired need to be looked at - Paola will take a look
- Vienna put into drain with merge issues - Do we have a ticket?
 - ◆ network timeouts
- Tails old work in system how are we going to attack, upped priority of some of the old workflows
- workflows that are rejected on our end but still in submitted on the requestor end
- rejected/aborted workflows that were not reported in elog:
<https://cms-logbook.cern.ch/elog/Workflow+processing/24957>
 - ◆ JR already took care of resubmitting these, but there are more
 - ◆ Until the workshop we need to use the tools we have and make sure you elog when you reject/abort workflows so we can keep track of what is going on.

Site support -

- Keep Estonia and Vienna in manual drain until we hear back from sites that problems fixed.

Transfer Team

- transfers from T0 to T1 has improved, 5GB/sec
- transfers from INR tape was down for the last 5 days or so but now they are better
- transfers that were stuck from FNAL are doing better now

Workflows

•

Agent Issues

- Krista wants machines for condor/osg/kernel upgrades and reboot we need to let her know when she can do her work.

Agent redeployment

- We are still waiting for agents to finish draining so we can do the redeploy
- 309 may go up will hopefully go up with new version
- 308 still needs work, keep our little paws off it it Alan is working on it.

Migration

- we need to work ACDC's still and see if it is functional for us, We should take a look and give feedback, this is for making the ACDC's via the web, and via the makeAllACDC's script

Merging Scripts

- a couple changes to ReqMgr2 cloning, this should be merged in
