glite-UI (64-bit, glite 3.2, production VOMS client).....	6
glite-WN (32-bit and 64-bit).....	6
Bugs attached to this patch.....	6
edg-voms continues to run with no logs despite /var/log/glite not existing. (bug #39646).....	6
IPv6 bug: various non compliant calls/data struct. the Client.cpp file of the org.glite.security.voms comp. (bug #41352).....	6
IPv6 bug: non compliant address data structure in source code (sockaddr_in) (bug #41354).....	6
voms-proxy-init should accept "-old" option (bug #42601).....	7
voms-proxy-info error for non standard location of CA files (bug #43942).....	7
Strange segfault in voms-proxy-init with erroneous command line (bug #44160).....	7
VOMS Logging, File logging can't be switched off. (bug #45132).....	7
VOMS File Logging Fails when file history rotation not preserved. (bug #45133).....	7
voms-proxy-init -key XXX -cert YYY uses the DN from the hostcert/key (bug #45331).....	7
VOMS' expat.m4 is not 64 bit safe (bug #45941).....	7
[VOMS] Proxies created by the 1.9.0 Java APIs fail verification (bug #46605).....	7
[VOMS] Missing calls to ERR_clear_error (bug #46689).....	8
[VOMS] Missing #include statements (bug #46690).....	8
[VOMS] Missing return statments (bug #46691).....	8
[VOMS] validation of proxies created by java fails (bug #46866).....	8
expose proxy_verify_callback() in the public api (bug #47718).....	8
glite-security-voms-api-noglobus should not be a dependency (bug #49210).....	8
voms-proxy-init asks for passphrase twice (bug #56434).....	8

Certification report for patches 3340, 3341, 3226, 2828

Nodes deployed

- glite-VOMS_mysql (32-bit, glite 3.1, patched)
- glite-VOMS_oracle (32-bit, glite 3.1, patched)
- glite-UI (32-bit, glite 3.1, old/new VOMS client)
- glite-UI (64-bit, glite 3.2, production VOMS client)
- glite-SE_dpm_mysql (32-bit, glite 3.1)
- glite-SE_dpm_mysql (64-bit, glite 3.1)

VOMS-CORE client changes detected:

voms-proxy-{init,info,destroy} -{help,usage} now exit with code 1.

glite-VOMS information system

Both VOMS-ADMIN and VOMS-CORE endpoints published OK and have reached the top-level BDII.

Yaim VOMS configuration.

Tested for both MySQL and Oracle backends.

Customizing of global VO parameters on a per VO basis verified.

Long FQAN is the default mode.

glite-WMS

Checked with old and new client installed.

DNS name based VOs checked.

CA certificates/VOMS server certificates which has email filed in the subject checked.

Proxy renewal verified (simple group FQAN and role containing FQANS checked)

Long FQAN, non-role, VOMS server side

```

glite-CREAM

Both direct submission with glite-ce-* commands and WMS ok.

Problem exists for CREAM when the VOMS server certificated is issued by an email based CA:

CertificationReportForPatches3340334132262828 < EGEE < TWiki

```
04 Nov 2009 09:09:10,284 org.glite.voms.PKIVerifier - Certificate verification: Verifying certifi

04 Nov 2009 09:09:10,301 org.glite.voms.PKIVerifier - Cannot verify issuer certificate chain for
```

glite-WMS with the new VOMS API is working well with 1.8.x VOMS servers.

glite-CREAM now uses VOMS Java API which is bundled inside the CREAM JAR. CREAM patch will be needed to resolve the above.

glite-SE_dpm_{mysql,disk}

SRM endpoint and GSIFTP OK.

FQAN processing by the DPNS server OK.

```
Executing CLI-dpns-chgrp
CLI-dpns-chgrp PASSED
```

```
Executing CLI-dpns-chown
CLI-dpns-chown PASSED
```

```
Executing CLI-dpns-getacl
CLI-dpns-getacl PASSED
```

```
Executing CLI-dpns-setacl

glite-HYDRA

Problems with installation/configuration found.

Missing dependencies:

- bdi
- glue
- openldap-servers
- openldap-clients
- mysql-server
- fetch-crl
- expect

Problems with tomcat/trustmanager configuration. The new config_secure_tomcat found to be working well for HYDRA.

/etc/grid-security/vomses not configured as well. The leads to:

```
2009-11-07 01:00:57,971 ERROR [http-8443-Processor25] No files found matching /etc/grid-security
```

HYDRA does not depend on VOMS. It's only the HYDRA CLI which uses the VOMS API. Since the CLI is not installed on the HYDRA node, the metapackage change for HYDRA is not needed.

CLI verified to work well with the new VOMS API on the 32-bit glite-UI.

glite-LFC_mysql, glite-LFC_oracle (32 and 64 bit).

No problems found. usermaps and groupmaps are being populated successfully when proxies from 1.9.x server are being used.

glite_FTA_oracle and glite-FTA_oracle

Transfer job flow OK.

Proxy renewal works fluently.

Oct 30 19:51:57 ctb-generic-9 myproxy-server:

glite-UI (64-bit, glite 3.2, production VOMS client)

Interoperability with the new VOMS server OK.

WMS and FTS job submission OK.

glite-WN (32-bit and 64-bit)

Jobs scheduled on both 32-bit and 64-bit WNs completed successfully.

VOMS API OK.

Bugs attached to this patch

edg-voms continues to run with no logs despite /var/log/glite not existing. (bug #39646)

Fix Certified. Server refuses to start when the log directory does not exist:

```
Starting edg-voms(org.glite.voms-email): logging could not start! Logfile /var/log/glite/voms.org
```

IPv6 bug: various non compliant calls/data struct. the Client.cpp file of the org.glite.security.voms comp. (bug #41352)

Fix not certified.

IPv6 bug: non compliant address data structure in source code (sockaddr_in) (bug #41354)

Fix not certified.

voms-proxy-init should accept "-old" option (bug #42601)

Fix Certified. "-old" is available

voms-proxy-info error for non standard location of CA files (bug #43942)

Fix Certified.

```
[shoo@ui32 jobs]$ voms-proxy-init -voms test -old
unable to access trusted certificates in:x509_cert_dir=/opt/globus/share/certificates
Function: proxy_init_cred
```

Strange segfault in voms-proxy-init with erroneous command line (bug #44160)

Fix Certified. Error message is printed:

```
[shoo@ui32 jobs]$ voms-proxy-init -cert ../.globus/2/usercert.pem -key ../.globus/2/userkey.pem -
Found non option element --debug in command line.
```

VOMS Logging, File logging can't be switched off. (bug #45132)

Fix Certified.

When "--logfile" is not present, voms-core uses only the syslog facility.

VOMS File Logging Fails when file history rotation not preserved. (bug #45133)

Fix Certified.

Rotation works in 1.9.10 when a gap exists. (The gap is preserved after the rotation - number increased by one).

voms-proxy-init -key XXX -cert YYY uses the DN from the hostcert/key (bug #45331)

Fix Certified.

Reproduces with 1.8.8. No-globus version of 1.9.10 OK.

VOMS' expat.m4 is not 64 bit safe (bug #45941)

Fix not certified.

[VOMS] Proxies created by the 1.9.0 Java APIs fail verification (bug #46605)

Fix Certified.

[VOMS] Missing calls to ERR_clear_error (bug #46689)

Fix not certified. (Newer gcc build oriented)

[VOMS] Missing #include statements (bug #46690)

Fix not certified. (Newer gcc build oriented)

[VOMS] Missing return statements (bug #46691)

Fix not certified. (Newer gcc build oriented)

[VOMS] validation of proxies created by java fails (bug #46866)

Fix Certified.

expose proxy_verify_callback() in the public api (bug #47718)

Fix Certified.

glite-security-voms-api-noglobus should not be a dependency (bug #49210)

Fix Certified.

voms-proxy-init asks for passphrase twice (bug #56434)

Fix Certified. voms-proxy-init asks for the passphrase once and regen OK.
