Summary (EMI Test Report Structure)

1. Deployment log:
 1. Clean Installation—**PASS**
 2. Upgrade Installation—**PASS**
2. Static Code Analysis—**N/A** (The prevalent programming language is C)
3. Unit Tests Execution—**YES**
4. System tests:
 1. Basic Functionality tests—**PASS**, except test suite trouble in Deb6 as explained below
 2. Regression tests—**PASS**
 3. Performance/Scalability tests—**N/A**
 4. Standard Compliance/Conformance tests—**N/A**

Remarks:

The builds and tests in this certification report rely on GridSite 1.7.23, which is also being released with EMI-1 update 21.

The package glite-lbjp-common-gsoap-plugin should NOT be released. Use the current version 3.0.2-6. In certification scripts is used 'exclude=glite-lbjp-common-gsoap-plugin-*' in repositories.

Clean installation, Scientific 5 (i386)

Environment

Clean installation according to EMI guidelines (CA certificates, proxy certificate...).

To start mysqld at boot time you have to copy
support-files/mysql.server to the right place for your system

PLEASE REMEMBER TO SET A PASSWORD FOR THE MySQL root USER !
To do so, start the server, then issue the following commands:
/usr/bin/mysqladmin -u root password 'new-password'
/usr/bin/mysqladmin -u root -h skirit77-2.ics.muni.cz password 'new-password'

Alternatively you can run:
/usr/bin/mysql_secure_installation

which will also give you the option of removing the test
databases and anonymous user created by default. This is
strongly recommended for production servers.

See the manual for more instructions.

You can start the MySQL daemon with:
cd /usr ; /usr/bin/mysqld_safe &

You can test the MySQL daemon with mysql-test-run.pl
cd mysql-test ; perl mysql-test-run.pl

Please report any problems with the /usr/bin/mysqlbug script!

To start mysqld at boot time you have to copy
support-files/mysql.server to the right place for your system

PLEASE REMEMBER TO SET A PASSWORD FOR THE MySQL root USER !
To do so, start the server, then issue the following commands:
/usr/bin/mysqladmin -u root password 'new-password'
/usr/bin/mysqladmin -u root -h skirit78-2.ics.muni.cz password 'new-password'

Alternatively you can run:
/usr/bin/mysql_secure_installation

which will also give you the option of removing the test
databases and anonymous user created by default. This is
strongly recommended for production servers.

See the manual for more instructions.

You can start the MySQL daemon with:
cd /usr ; /usr/bin/mysqld_safe &

You can test the MySQL daemon with mysql-test-run.pl
cd mysql-test ; perl mysql-test-run.pl

Please report any problems with the /usr/bin/mysqlbug script!

To start mysqld at boot time you have to copy
support-files/mysql.server to the right place for your system

PLEASE REMEMBER TO SET A PASSWORD FOR THE MySQL root USER !
To do so, start the server, then issue the following commands:
/usr/bin/mysqladmin -u root password 'new-password'
/usr/bin/mysqladmin -u root -h skirit79-2.ics.muni.cz password 'new-password'

Alternatively you can run:
/usr/bin/mysql_secure_installation

which will also give you the option of removing the test
databases and anonymous user created by default. This is
strongly recommended for production servers.

See the manual for more instructions.

You can start the MySQL daemon with:
cd /usr ; /usr/bin/mysqld_safe &

You can test the MySQL daemon with mysql-test-run.pl
cd mysql-test ; perl mysql-test-run.pl

Please report any problems with the /usr/bin/mysqlbug script!

To start mysqld at boot time you have to copy
support-files/mysql.server to the right place for your system

PLEASE REMEMBER TO SET A PASSWORD FOR THE MySQL root USER !
To do so, start the server, then issue the following commands:
/usr/bin/mysqladmin -u root password 'new-password'
/usr/bin/mysqladmin -u root -h skirit77-2.ics.muni.cz password 'new-password'

Alternatively you can run:
/usr/bin/mysql_secure_installation

which will also give you the option of removing the test
databases and anonymous user created by default.  This is
strongly recommended for production servers.

See the manual for more instructions.

You can start the MySQL daemon with:
cd /usr ; /usr/bin/mysqld_safe &

You can test the MySQL daemon with mysql-test-run.pl
cd mysql-test ; perl mysql-test-run.pl

Please report any problems with the /usr/bin/mysqlbug script!

Unit Tests

L&B employs a number of unit tests. They are integrated into the build process and any unit test failure causes the build to fail. However, the build infrastructure (ETICS) does not provide any way of collecting comprehensive unit test results. Thus, unit tests results are scattered over the build reports of individual L&B components. See build reports for unit test output.
