glite_3_1_cert Log

This twiki page is updated every time a new component/subsystem configuration is updated in `glite_3_1_cert`. When a new component/subsystem configuration is available, `glite_3_1_cert` is cloned and locked in `glite_3_1_X_1`, where X is incremented every time. So `glite_3_1_cert = glite_3_1_X_1`, being X the latest update.

Note that there is a project property, `gLiteProjectVersion`, storing the version of the project configuration.
