

3.1.0 PPS Update 08

Release date: 18.10.2007

This update introduces new metapackages (node types) for *lcg-CE*, *glite-TORQUE_server* and *glite-TORQUE_utils*.

Comment [18.10.2007]: The YAIM patches #1413 and #1415 added to the release. TORQUE_client, UI and WN versions increased correspondingly. UI requires re-configuration according to the patch #1415.

Comment [19.10.2007]: Location of the tarballs has been added on the page.

Comment [31.10.2007]: This update was announced as an EGEE broadcast.

IMPORTANT NOTE

It is worth mentioning that **the repository structure has been changed** to match with the production repository and it consists of the following three sub-directories.

<http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.1/> ...

Subdir	Description
RPMS.externals	location for the first version of external packages
RPMS.release	location for the first version of gLite packages
RPMS.updates	location for successive versions of all packages

To facilitate the comparison between the old repository (PPS Update 07) and this new release, the following two directories have been made temporarily available. Note! These are not repositories, and they cannot be used for installations because the required metadata has been excluded.

1) The old repository structure with packages from 3.1 PPS Update 07

<http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.1-update07-old/> ...

2) The new repository structure with packages from 3.1 PPS Update 07

<http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.1-update07-new/> ...
