## Original release notes

Please have a look in the **patch descriptions** (urls available above).

Release notes (gLite 3.1) and the generic installation instructions can also be found in:

- The Generic Installation Guide for gLite 3.1

In addition, recent installation instructions can be found for the following node types:

- glite-UI

## Known Issues

- Patch #3101 [↗](#): When trying to configure the LB, there's an error because package `glite-info-provider-service` is not installed as a dependency. Install it manually running `yum install glite-info-provider-service` until the mentioned patch reaches PPS.

## Tarball for UI

The installation instructions can be found at:

- glite-UI
