

## 3.2.0 PPS Update 06

Update date: 03.09.2009

### Preface

This is an update to PPS containing a set of patches with updates to GFAL, yaim core and clients, BDII, lcg-infosites and Myproxy. It also releases TORQUE server and TORQUE utils for the first time in SL5.

### Mirroring

Changes have been committed in the following repository locations:

- [http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.2/glite-GENERIC/sl5/x86\\_64](http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.2/glite-GENERIC/sl5/x86_64)
- [http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.2/glite-metapackage-name/sl5/x86\\_64](http://grid-deployment.web.cern.ch/grid-deployment/glite/pps/3.2/glite-metapackage-name/sl5/x86_64)  
glite-metapackage-name should be replaced by the affected client/services

The necessary repository files can be downloaded from the 3.2 PPS repository directory [here](#).

**Known issue:** the repositories are ready to be splitted per node type when we move towards the product team model without any impact to the users, i.e. repo files remain the same. Right now, the repositories are splitted per node type as far as repodata is concerned, but the location of the packages is common. The repodata should be the same though since we haven't yet done the splitting, but due to the way the repositories are created, the repodata doesn't contain information about all the metapackages. It could happen that if you try to install two different node types in the same machine with the two repo files enabled, it fails to install one of them. In that case, enable the node type specific repository disabling the other ones.

### Patches

The following patches are included in the release:

No	Description	Priority
<a href="#">3074</a>	SL5/x86_64: glite-TORQUE_utils and torque update for TORQUE_clients	Normal
<a href="#">3079</a>	R3.2 MyProxy 4.7 client	Normal
<a href="#">3097</a>	SL5/x86_64: glite-TORQUE_server	Normal
<a href="#">3106</a>	[ yaim-core ] yaim-core 4.0.10 SL5/x86_64	Normal
<a href="#">3112</a>	[ yaim-clients ] yaim clients 4.0.9 SL5/x86_64	Normal
<a href="#">3119</a>	R3.2/SL5/x86_64: gfal v1.11.8-2 and lcg_util v1.7.6-1	Normal
<a href="#">3159</a>	new lcg-infosites version solving bug 38922 SL5/x86_64	Normal
<a href="#">3172</a>	SL5/x86_64 New glite-swat rpms	Normal
<a href="#">3206</a>	GLUE 2.0Enabled BDII SL5/x86_64	Normal

### Metapackages to be reconfigured

- glite-BDII
- glite-LFC\_mysql
- glite-SE\_dpm\_mysql
- glite-TORQUE\_client
- glite-TORQUE\_server
- glite-TORQUE\_utils
- glite-UI
- glite-WN

## New Metapackage versions

### 64bit

- PPS-glite-BDII 3.2.4-0
- PPS-glite-LFC\_mysql 3.2.2-0
- PPS-glite-SE\_dpm\_mysql 3.2.2-0
- PPS-glite-TORQUE\_client 3.2.4-0
- PPS-glite-TORQUE\_server 3.2.1-0
- PPS-glite-TORQUE\_utils 3.2.1-0
- PPS-glite-UI 3.2.4-0
- PPS-glite-WN 3.2.5-0

## Metapackages to be restarted

### 64bit

- glite-BDII
- glite-LFC\_mysql
- glite-SE\_dpm\_mysql
- glite-TORQUE\_client
- glite-TORQUE\_clients
- glite-TORQUE\_server

## Original release notes

Please have a look in the **patch descriptions** (urls available above).

Update notes (gLite 3.2) and the generic installation instructions can also be found in:

- The Generic Installation Guide for gLite 3.2

In addition, recent installation instructions can be found for the following node types:

- glite-UI

## Tarballs for UI

The installation instructions can be found at:

- glite-UI
