Pilot and Experimental Services in EGEE

A pilot is a highly specialized workspace set-up upon demand of classes of users willing to test a particular new grid feature, customised according to user requirements. The users of a pilot service receive direct support by middleware developers, testers, operations experts and service administrators for the completion of their use cases.

Users or communities willing to request a pilot service should contact the Pilot Services Support e-mail list

Active pilot services

- glxec/Argus
- Create new pilot main page:
(*Please use a descriptive name e.g. PilotServiceArgus, PilotServiceMPI ...*)

The template used for new pilot home pages is PilotServiceHomeTemplate. Any changes made to the template will only influence new pages.

Pilots wikis created from this page are PilotServiceArgus, PilotServiceHomeTemplate

Closed pilot services from PPS

- VOMS
- Site Central Authorization Service (SCAS)
- Cream CE
- HEP dependency meta-rpm)
- WMS 3.2
- SLC5 Worker Nodes
- WMS 3.1
