

List of gLite client versions supported by SA1 Operations

The following list was created using these simple rules:

- All versions released within the last 6 months will be supported by SA1.
- Older versions can be supported if a specific requested is made to occ-grid-support@cern.ch
- **NO** versions older than 12 months will be supported (unless there has been no update to that service in the last 12 months, in which case that latest version will be supported).
- Early deprecation of a version can be requested at any time. Contact occ-grid-support@cern.ch.

NOTE: The version numbers below are the *oldest* version numbers supported. All versions subsequent to these are supported.
