	Primary Team	Secondary Team
From	ROC DECH	ROC Italy

- GGUS:34400 [↗](#) ticket . Being worked on, held up by new hardware and new deployment techniques. Create action item.

Assigned to	Due date	Description	State	Closed	Notify
		Upgrade lcg-utils on SAM submission host.			
Main.SAM	2008-06-30	Latest version of lcg_utils installed in SAM validation testbed & used against this site. Previous version failed with: protocol not supported by Storage Element Latest version fails with: CGSI-gSOAP: Error reading token data header: Connection reset by peer  Problem seems to be with the data that the site provides to the Information System.		2008-07-08	edit

- IL-IUCC , should it be closed, unanswered items? GGUS:37110 [↗](#), GGUS:36185 [↗](#) and GGUS:36262 [↗](#).

		Submit somewhere request for better downtime publishing as proposed by atlas sometime ago.			
SteveTraylen	2008-06-30	*Update 1st July* <a href="https://savannah.cern.ch/support/?104871">https://savannah.cern.ch/support/?104871</a> now submitted.		2008-07-08	edit

Steve

the request for better downtime.

Atlas view of downtimes: <http://dashb-atlas-data-tier0.cern.ch/dashboard/request.py/site?statsInterval=4>  
click e.g. on the link LYON, it will open a list of sites. there are few of light gray, like IN2P3-CC\_DATADISK. The last column is an ok/down colored green/red. click there, and you'll have this. note that also the downtime is clickable and redirect you to the gocdb.

## ALICE Service

Absent.

## CMS Service

Absent

## LHCb Service

LHCb is running its DC06 activity at full regime. Stripping activity pointed out issues at RAL (still jobs cannot get there after the incident with the CMS rogue user killing the system with 10K jobs at once), IN2p3 (data access problem with gsidcap, Philippe sent all information through the GGUS ticket open for debugging their SRM/SE system), CNAF is in downtime, SARA: failures uploading output data.

- CIC broadcast information: received one for IN2p3, reason: queues drained (which is not very useful and informative) and one for GRIF: scheduled intervention, reason: unexpected hardware failure (but how can then be the intervention scheduled?).
- LHCb asked about VOMS roles use within GGUS. Maria reported previously GGUS was flat but no longer the case. There is a savannah ticket. <https://savannah.cern.ch/support/?103378>.

## WLCG Service Coordination

agenda  contains details of base line storage services.

## OSG Items

GGUS:36261  opened on the 8th May. Comment is in the internal diary, now very delayed. No response so far. Within EGEE ROCs sites that do not respond at all in 21 days will be removed.. **this is being considered at the moment.** Maybe can be considered for OSG as well. Will be followed up.
