# APEL Publisher v. 3.2.7

## Release Notes

### What's new:

- APEL publisher allows VO filtering (list of VOs for which the site wants to publish accounting data to the central server) and mapping between local groups to VOs.
- APEL publisher can be run in only joining mode without contacting the broker.
- The publisher doesn't start the ActiveMQ session until the joining of records has been done, avoiding timeouts.
- The default value for the Limit variable has been lowered to avoid out of memory problems.

### Deployment notes:

- The service must be reconfigured with YAIM after updating/installation.

### Known issues:

- No known issues.

## List of RFCs

- APEL should allow per-VO publishing configuration [↗](#)
- APEL publisher with option republish=nothing should not try to connect to broker [↗](#)
- Number of Archiver Records found doesn't match the published one. [↗](#)
- YAIM for glite-APEL does not add a user with host=glite-APEL hostname [↗](#)
- APEL publisher times out when joining/dealing with a lot of data [↗](#)
- Lower the default Limit for glite-APEL [↗](#)
- APEL republish all should overwrite records in LcgRecords [↗](#)
- EMI APEL path for configuration file wrong [↗](#)
