ARC CE Product Team

Product description

The ARC computing element (CE) implements job execution capability over a large variety of computational resources. The ARC CE PT is in charge of delivering all components necessary for it to function. These include:

- A-REX
- ~~Grid Manager~~ - *phased out in May 2011*
- GridFTP jobplugin interface
- Infoproviders - *new since May 2011 (merged from another PT)*
- CE cache
- CE staging
- LRMS modules
- ~~Janitor~~ - *phased out in May 2012*
- JURA - UR reporting
- nordugridmap - *new since May 2011 (merged from another PT)*
- ~~updatecrls~~ - *merged from another PT and phased out in May 2011*

The ARC CE PT has components belonging to all 4 Technical Areas: Compute, Data, Security and Infrastructure
