# EMI 1 (Kebnekaise) - Update 21 (26.11.2012), v. 1.14.0-1

The Update contains:

- minor release of L&B v. 3.2.9
- revision releases of Gridsite, v. 1.7.23 and VOMS Java API v. 2.0.9-1

## v. 1.7.23 Task #36602 [↗](#)

### What's new:

- This is a bugfix release for GridSite, addressing several bugs: VOMS attribute handling, httpd module loading priorities, mod\_gridsite failure on access from machines with no reverse DNS records, and a memory leak in GRSTx509CreateProxyRequest().

### Installation and Configuration:

- To deploy, update your installation and restart the Web-server.

### Known issues:

- None

### List of:

- Bug Fixes:

## L&B v. 3.2.9 Task #36601

### What's new:

- L&B 3.2 implements extended messaging capabilities (job history, anonymization), server-side statistics, finalized CREAM support, and provides fixes for multiple bugs identified in various stages of the product's life cycle.
- Documentation was updated to reflect the changes.
- This release also provides fixes for previously unhandled c-ares exceptions, occasional notification interlogger crashes and problems with dumping and loading L&B events.
- A few minor bugs have also been fixed and documentation was updated to reflect L&B's release status and several new tests.

## Installation and Configuration:

- emi-lb metapackage is installed by yum.
- yaim configuration requires, at the very least, setting MYSQL\_PASSWORD, SITE\_NAME and SITE\_EMAIL in the site-info.def file.
- Reconfiguration is required. reconfiguration by YAIM will restart the service automatically.
- The emi-lb metapackage does not install the Nagios plugin. It (package emi-lb-nagios-plugins) can be installed separately.

## Known issues:

- None

## List of:

## VOMS api Java v. 2.0.9-1 Task 37760

### What's new:

- This release provides bug fixes for the following issues:
  - ◆ VOMS-131: - A vulnerability has been found in VOMS Java APIs
  - ◆ More information will be provided by EGI SVG in ADVISORY-XXX

## Installation and Configuration:

- After the packages are upgrade services that rely on the APIs should be restarted.

## Known issues:

- None

## List of:

- Bug Fixes:
  - ◆ High
    - ◇ <http://issues.cnaf.infn.it/browse/VOMS-131>

## Documentation:

- [VOMS-Documentation](#)
