EMI 1 (Kebnekaise) - Update 4 (21.07.2011)

The Update contains:

- emergency releases for BDII core, v. 1.0.1 and WMS, v. 3.3.1-1
- revision releases for ARGUS, v. 1.3.1, CEMon, v. 1.13.2, CREAM, v. 1.13.2, Gridsite, v. 1.7.15, Trustmanager, v. 3.0.5

ARGUS v. 1.3.1 task #20989 [↗](#)

What's New:

- The Argus PAP handles kerberized style DN correctly (e.g. "/CN=service/host.example.com").
- The Argus PEP Server mapping obligation handler updates the timestamp of the lease file each time a mapping is done.
- The Argus PEP Server mapping obligation handler have a new option 'useSecondaryGroupNamesForMapping' to create lease file names with or without the secondary groups of the user (default: true).
- The Argus PEP Server mapping obligation handler lease file names encoding is fully compliant with the legacy gLExec LCAS/LCMAP encoding.

Deployment Notes:

- After the update is applied the PAP and the PEP Server services are stopped. + You must re-configure the Argus services with YAIM. This will automatically restart the services.

gridsite v. 1.7.15 task #20915 [↗](#)

What's New

This is a bugfix release for GridSite. Several bugs are addressed, most importantly the handling of VOMS .lsc files. *) Several issues in the code and the build process have also been mended for the benefit of developers relying on GridSite in their applications.

*) lsc files simplifies gridsite deployment as the installation of VOMS server certificates on the service node is no longer required.

Deployment notes

To deploy, update your installation and restart the Web-server.

Trustmanager v. 3.0.5 task #21011

What's New

- bug fix to handle properly the DESY DNs, to allow delegation to CREAM.
- cosmetic bug fix to put properly unlimited proxy path limit when delegating RFC3820 proxies. Previously INT_MAX was put.
- no change on documentation.

Deployment Notes

Relevant services that use this library need to be rebuilt to get the library to the WAR file of the service. Thus they'll need to be reconfigured and restarted, but that will be described by the relevant service product, when they release their update.

BDII core v. 1.0.1 task #21404 - Emergency Release

What's New

This bdii release addresses an incompatibility issue with the ARC infosys.

Deployment Notes

No re-configuration is required and the service should automatically restart on installation of the package.

bdii-5.2.4-1.el5.noarch.rpm
Sources RPM
bdii-5.2.4-1.src.rpm

WMS v. 3.3.1-1 task #21572 - Emergency Release

What's New

This update of WMS fix a major problem in ICE concerning proxy internal structure conversion.

Deployment Notes

Yaim reconfiguration is NOT required after update, simply restart glite-wms-ice service.

Updated Artefacts

Binary
glite-wms-ice-3.3.3-1.sl5.x86_64.rpm

CREAM v. 1.13.2 task #21573

What's New

This is just a rebuild of CREAM needed to integrate the new trustmngner release (which fixes a problem affecting proxies signed by certain CAs, such as the GermanGrid CA)

Deployment Notes

Yaim (re)configuration is required after installation/update. Known issues, if any, are reported here [↗](#).

Updated Artefacts

CEMon v. 1.13.2 task #21574 [↗](#)

What's New

This is just a rebuild of CEMon needed to integrate the new trustmanager release (which fixes a problem affecting proxies signed by certain CAs, such as the GermanGrid CA)

Deployment Notes

Yaim (re)configuration is required after installation/update.

Since CEMon is deployed together with CREAM, please refer to the installation and configuration notes for the whole CREAM-CE
