# EMI 2 (Materhorn) - Acceptance Criteria List

The acceptance criteria are the conditions by which a Product is considered ready or not for inclusion in an EMI release. The criteria can be "exclusive" or "inclusive". Failing an exclusive criterion causes exclusion from the release, failing an inclusive criterion doesn't cause exclusion from the release, but the Product is marked as not fully compliant with the release criteria. The exclusive criteria are marked in **bold** in the table. Refer to the legend for an explanation of the colour coding.

GREEN	OK
YELLOW	Failed, but an alternative exists (for example documentation is not PDF, but another usable format is provided as a temporary workaround)
RED	Failed

Certification Report	XXXXXXXXXXXXXX	Documentation	Source RPMS	Binary tarball	Source tarball	Comments
