

EMI Data Storage Accounting Meeting, Jan. 20, 2011, 10:00-11:30

People: Ralph, Riccardo, Henrik, Paul, Jon Excused: Zsolt

Minutes

- Discussion of input from externals
 - ◆ Mostly asking for clarifications
 - ◆ Brian is suggesting a UniqueID. Consensus that we already have a information needed to create a UniqueID covered in other properties, so we don't need an extra property. Technically, it's straight forward to extract this from a database.
- Plan forward
 - ◆ What does OGF need?
 - ◇ TBD
 - ◆ What does EMI need?
 - ◇ No input from Patrick yet
- We will still aim for finishing the draft within Monday 31 January
 - ◆ The most tricky topics are the ValidDuration, multiple IDs and the overlapping areas (Brian's comment number 5)
 - ◆ We should gather use-cases for or against these topics on CommentsOnStar and discuss them on the mailing list and come to a conclusion within middle of next week (Wednesday 26 January)
 - ◆ The rest of the time towards Monday 31 should be spent on implementing clarifications and finish the draft.
