General comments

The document is satisfactory. Only remark: It still does not provide a complete view on how QA and QC will be implemented in the project (the details will be in the satellite documents still in preparation (tools doc, change management guidelines, release process etc...)), but it's a good starting point.

Additional comments and suggestions in the notes and corrections in the attached document (as requested by the authors).

Additional recommendations (not affecting the document content, e.g. recommendation for future work)

None.

Detailed comments on the content

In the attached document.
