UNICORE Security Product Team

Below the products maintained by this PT are listed. Previously (during project year 1) also XACML, AIP and UNICORE security libraries were assigned to this PT. Now those components are part of UNICORE Services Environment, managed by UNICORE Container PT.

Services

UNICORE Gateway

Service Reference Card: UNICORE gateway

Validation and Verification Plan: Gateway Verification and Validation Plan

UNICORE XUADB

Service Reference Card of the XUADB server: UNICORE XUADB

Validation and Verification Plan: XUADB Verification and Validation Plan

UVOS

UVOS (UNICORE Virtual Organisations System) is scheduled to be phased out in EMI.

Service Reference Card of the UVOS server: UVOS Server

Validation and Verification Plan: UVOS Verification and Validation Plan

The UVOS web page can be found here: <http://uvos.chemomentum.org/>

Product Team work

The PT Y1 workplan can be found here.

One of the potential tasks of the PT is to move UNICORE stack to use OpenSAML library instead of the currently used samly2 library. The analysis of such an effort is available here.

The analysis of usage of short lived certificates in UNICORE.
