About Subtitles Entry

Title: About Subtitles Entry

Duration:

05:06

Public

Material

Screen capture with voice over.

Description

How to enter subtitles to your video using Aegisub. This video was done in the framework of this project 4 weeks in the summer of 2018. An alternative, and easier, method to introduce subtitles is by entering the video in YouTube. This can be a private upload. Details by Achintya Rao & comments by Kyle Dawson:

_The YouTube route is both efficient and convenient, provided you’re able to upload the videos there (even as unlisted/private videos).

• The auto-transcription generates English subtitles with timestamps that may contain some errors (particularly with non-British/non-American accents when the videos are in English). However, these can be easily corrected and one can publish the approved/correct version trivially using the built-in tools.
• A link can be sent out requesting people to translate the subtitles to their languages. The workflow is straightforward: one can auto-translate the subtitles to the language of choice, complete with timestamps (say, EN to FR), so the person has a lower threshold to contribute the subtitles. Then, when they submit it, the owner of the video is presented with a machine-translated version of the (say) FR text back to (say) EN, to compare with the original text.
• You can export the final subtitle file to .vtt or .srt – CDS uses .vtt
• More details:
  ♦ Add your own subtitles & closed captions
  ♦ YouTube tools to translate your content
  ♦ A similar (Google-driven) translation workflow document by A.Rao
