# MarlinTPC

The goal of MarlinTPC is to get a highly modular reconstruction and analysis framework for ILC TPC R&D with standardized interfaces between its modules. This ensures that despite of the large diversity of readout structures, electronics, amplification system, etc. much code can be shared among the groups and that different algorithms developed by different people or data taken by different groups can be easily compared.

MarlinTPC is an implementation of the TPC data model as described in this document [↗](#).
