# E-Groups used in IT-GT-\*

Many of our services depend on the central e-groups service [?](#) to control access to hosts etc. The ones we use are described below, and their roles.

## System Administrators

(These are groups that should have root access to all machines)

Group Name	Owner	Rights	Machines
<a href="#">it-gt-admin link</a> <a href="#">?</a>	it-gt-admin-admin (e-group)	Currently LanDB responsible of most ITGT machines, Root Access (ssh/kerberos), CVI webservice access to ITGT/(?)	~475
<a href="#">it-gt-admin-admin link</a> <a href="#">?</a>	tomasz (person)	e-group changes	NO
<a href="#">it-gt-cvi-admin link</a> <a href="#">?</a>	it-gt-admin-admin (e-group)	CVI webservice to ITGT/(?)	?

## Projects

### VNode

Group Name	Owner	Reason / Description
it-gt-vnode-users	tomasz	mailing list (vnode information), to delete with vnode decomission
vnode-cvi-migration	andrew	Discussion - can be deleted?
vnode-users	andrew	generated via a script prior to any mailings (people with an active guest)
