

LCG Grid Deployment - gLite Pre Production Services - PPS-CERN Admin Procedures

The `INSTALL_ROOT` path of the AFS UI is under

`/afs/cern.ch/project/gd/egee/glite/`

For every installation you should create a new directory. So far the naming scheme has been `ui_PPS_glite$VERSION_STRING` for instance **ui_PPS_glite3.0_UPDATE16** or **ui_PPS_glite3.0_slc4**.

Follow the instruction for the production UI and remember that for the PPS AFS UI the `INSTALL_ROOT` is different, and that you do not need to synchronize the shared volume as it is installed on a writeable partition.

The CA certificates and revocation lists are shared with the production UI.
