

Official GD UI on lxb7962 with incoming connectivity

A UI dedicated to our group has been put in production. If you would like to use this node to test specific middleware components (eg. globus-job-run, GridFTP active mode), please contact SteveTraylen (or if away MaartenLitmaath) in order to grant you access on this node using your AFS login. Note that this particular UI **must not be used** as a production UI or opened to the experiments or other non-GD users, it is reserved to a limited number of GD experts who have an explicit need for such connectivity. It is **not** a CERN GD production service.

| Machine Name | OS | gLite Version | Notes |
|-----------------|------|---------------|------------------------------------|
| lxb7962.cern.ch | SLC4 | gLite 3.1 | available under alias gdui.cern.ch |

Note that with this node, it is possible to execute globus-job-run with target CEs located outside CERN:

```
[lxn1194]> globus-job-run tbn20.nikhef.nl /usr/bin/id
uid=40214(dteam014) gid=2013(dteam)
```

```
[lxn1194] globus-job-run lxb2034.cern.ch /usr/bin/id
uid=18959(dteamsgm003) gid=2690(dteamsgm) groups=33536,37527,2688(dteam)
```

2006-09-24

A new GD UI 3.1 node (lxn1179) has been put in production. This node will replace lxn1194 as soon as the configuration of this node looks fine.

2008-02-12

Care of the machines taken over by SteveTraylen.
