Finding the right site name

For endpoints not in the list above, you can use the following tools to try to find the site name.

Idapsearch

```
ldapsearch -x -H ldap://lcg-bdii.cern.ch:2170 -b o=glue '(GLUE2ServiceID=*endpoint.fqdn*)'
GLUE2ServiceAdminDomainForeignKey
```

If the above search doesn't return a result, try with just the domain (rather than full endpoint).

GOCdb

```
wget -O - --no-check-certificate
"https://goc.egi.eu/gocdbpi/public/?method=get_service&hostname=endpoint.fqdn"
```

AGIS (Atlas endpoints)

Search for endpoints here ; http://atlas-agis.cern.ch/agis/ddm_endpoint/table_view/
