

## Error

You get this error

```
NS003 - illegal function 80
```

Or this error:

```
$ tail -f /var/log/lfc/log
...
11/23 09:37:13 12001,0 sendrep: NS003 - illegal function 12
...
```

## Solution 1

It can mean that you are using a method that is not supported by the LFC server you are contacting.

Check the value of `$LFC_HOST`. And contact the administrators of this LFC server, to see if they run a version of the LFC server supporting the method.

## Solution 2

It can mean you are calling a method that is not allowed after another call has failed.

For instance, if an `lfc_opending` fails, you cannot call `lfc_closedirg` afterwards. (In LFC/DPM 1.4.1, this is fixed, and the `lfc_closedirg` is automatically ignored).

**The solution is** : check the possible failures in your code, so that `lfc_closedirg` isn't called if `lfc_opending` has failed !

## Help !

If it still doesn't help, contact [support@ggusNOSPAMPLEASE.org](mailto:support@ggusNOSPAMPLEASE.org) (remove the NONSPAM !).
