## IN2P3-Lyon Site Capacity Growth Plans 2007/2008

Last Updated 31.10.2007: email of 19 September from Fabio Hernandez <fabio@in2p3.fr>

please find attached the updated figures on the installed capacity of the WLCG tier-1 at CC-IN2P3 as of today.

You will notice that the installed capacity is bigger than our 2007 pledges because we have already purchased and installed a significant fraction (~40%) of the additional capacity required to honour our pledges for (April 1st) 2008. The allocation of those resources (in particular, disk) will be progressively done on the experiments' demand.

LCG Tier-1@CC-IN2P3: Installed Capacity as of 2007-09-19

Expt	CPU[k SI2000]	disk [TB]	MSS [TB]
Alice	508	275	345
Atlas	1044	601	456
CMS	707	346	521
LHCb	309	173	146

Total 2568 | 1394 | 1469
