

LCG Grid Deployment - gLite Pre Production Services - Pre Production Coordination - PPS Current Programs

## Interactive access to PPS nodes

**Note:** interactive access to nodes for users is not an "officially supported" PPS feature. As for all other services, site administrator can decide or accept to grant connection rights to particular users for testing, debugging or support purposes. When it happens this is done locally and under total responsibility of the site.

In this page we try and give, at best of our knowledge, a list of sites where, upon explicit request coming from a VO, particular users can log into one or more nodes in order to analyse and watch closely the behavior of their applications.

Site	Supported VOs	Node(s)	User(s)	Notes
CERN_PPS	Atlas	one SLC4 WN	Simone Campana, Rod Walker	Application validation: interactive login as non-privileged users
CERN_PPS	LHCb	one SLC4 WN	Roberto Santinelli	Application validation: interactive login as non-privileged users
