Status of criteria to be met before transition can start

Note:

This table deals with the criteria for *starting the transitioning* from the LCG CE to the CREAM CE. It does **NOT** deal with the initial deployment of the CREAM CE into the production service: the CREAM CE is *already* available in the production middleware repositories and all sites are *strongly* encouraged to deploy a CREAM CE in parallel to their LCG CE.

You can also **click here** to see the status of those features that weren't considered showstoppers for the transition, but which are nevertheless still considered as *very* important for the CREAM CE.
