AFS UI Known bugs

This page is for AFS UI Administrators. These are the bugs coming from middleware/Yaim which we try to fix at the time of configuration manually or by scripts.

gLite 3.0

Link to bug or ticket if present	Hack to fix it
savannah 18024 ↗	Copy an old vomses file into the glite/etc/ directory.
savannah 24713 ↗	Copy the content of the .edg/vomses directory into the \${INSTALL_ROOT}/edg/etc/vomses directory.
savannah 22942 ↗ savannah 23746 ↗	Configure the VOs as described here. We suggest you copy the files from the previous version of the UI, changing them if necessary.
savannah 24820 ↗	Move the DPM RFIO client commands (if any) out of the way, because they cannot (yet) work with CASTOR. <pre>cd \${INSTALL_ROOT}/lcg/bin mkdir dpm mv rf* dpm</pre>
savannah 22510 ↗	Ensure that the following file for the WMS, \${INSTALL_ROOT}/glite/etc/glite_wmsui_cmd_var.conf plus one file per vo: \${INSTALL_ROOT}/glite/etc/\$VO/glite_wms.conf have these lines: <pre>ErrorStorage = "/tmp"; OutputStorage = "/tmp"; ListenerStorage = "/tmp"; # LoggingDestination = "some-node.cern.ch:9002"; # it must be commented out or abse DefaultVo = "unspecified";</pre> Usually the storage variables refer to /tmp/glite/glite-ui, and the default VO to dteam..
savannah 24714 ↗	Ensure that the two files for the RB \${INSTALL_ROOT}/edg/etc/edg_wl_ui_cmd_var.conf and \${INSTALL_ROOT}/edg/etc/edg_wl_ui_gui_var.conf , have these lines: <pre># LoggingDestination = "some-node.cern.ch:9002"; # it must be commented out or abse DefaultVo = "unspecified";</pre> If this line is present and more than one RB is used it will cause errors as the LoggingDestination depends for the RB and is picked up automatically by the system if not set.
GGUS 17491 ↗ savannah 23285 ↗	Both environment scripts need to be sourced. Add the following line to grid_env.sh <pre>source \${INSTALL_ROOT}/etc/profile.d/glite_setenv.sh</pre> and the following to grid_env.csh <pre>source \$INSTALL_ROOT/etc/profile.d/glite_setenv.csh</pre>
savannah 25866 ↗	Globus development environment is not configured. You should set two environment variables and run the gpt-build command: <pre>export GLOBUS_LOCATION=/afs/.cern.ch/project/gd/LCG-share/X.Y.Z-W/globus/ export GPT_LOCATION= /afs/.cern.ch/project/gd/LCG-share/X.Y.Z-W/gpt/ \${GPT_LOCATION}/sbin/gpt-build -force -nosrc gcc32 gcc32pthr gcc32dbg gcc32dbgpthr</pre>

gLite 3.1

Link to bug or ticket if present	Hack to fix it
savannah 28491 ↗	Copy a working tcsh environment script from the previous release and modify it accordingly (new dir for new installation and compare it with its bash equivalent).
savannah 18024 ↗	Copy an old vomses file into the glite/etc/ directory.
savannah 24713 ↗	Copy the content of the .edg/vomses directory into the \${INSTALL_ROOT}/edg/etc/vomses directory.
savannah 22942 ↗ savannah 23746 ↗	Configure the VOs as described here. We suggest you copy the files from the previous version of the UI, changing them if necessary.
savannah 24820 ↗	Move the DPM RFIO client commands (if any) out of the way, because they cannot (yet) work with CASTOR.
savannah 22510 ↗	<pre>cd \${INSTALL_ROOT}/lcg/bin mkdir dpm mv rf* dpm</pre>
savannah 22510 ↗	<p>Ensure that the following file for the WMS, <code>\$INSTALL_ROOT/glite/etc/glite_wmsui_cmd_var.conf</code> plus one file per vo: <code>\$INSTALL_ROOT/glite/etc/\$VO/glite_wms.conf</code> have these lines:</p> <pre>ErrorStorage = "/tmp"; OutputStorage = "/tmp"; ListenerStorage = "/tmp"; # LoggingDestination = "some-node.cern.ch:9002"; # it must be commented out or absent DefaultVo = "unspecified";</pre> <p>Usually the storage variables refer to <code>/tmp/glite/glite-ui</code>, and the default VO to <code>dteam..</code></p>
savannah 24714 ↗	<p>Ensure that the two files for the RB <code>\$INSTALL_ROOT/edg/etc/edg_wl_ui_cmd_var.conf</code> and <code>\$INSTALL_ROOT/edg/etc/edg_wl_ui_gui_var.conf</code>, have these lines:</p> <pre># LoggingDestination = "some-node.cern.ch:9002"; # it must be commented out or absent DefaultVo = "unspecified";</pre> <p>If this line is present and more than one RB is used it will cause errors as the LoggingDestination depends on the RB and is picked up automatically by the system if not set.</p>
savannah 25866 ↗	<p>Globus development environment is not configured. You should set two environment variables and run the <code>gpt-build</code> command:</p> <pre>export GLOBUS_LOCATION=/afs/.cern.ch/project/gd/LCG-share/X.Y.Z-W/globus/ export GPT_LOCATION= /afs/.cern.ch/project/gd/LCG-share/X.Y.Z-W/gpt/ \${GPT_LOCATION}/sbin/gpt-build -force -nosrc gcc32 gcc32pthr gcc32dbg gcc32dbgpthr</pre>
savannah 27362 ↗	<p><code>\$INSTALL_ROOT/etc/profile.d</code> links are incorrect. The links should be set up as the following</p> <pre>grid-env.csh -> ../../external/etc/profile.d/grid-env.csh grid-env.sh -> ../../external/etc/profile.d/grid-env.sh grid_env.csh -> ../../external/etc/profile.d/lcgenv.csh grid_env.sh -> ../../external/etc/profile.d/lcgenv.sh lcgenv.csh -> ../../external/etc/profile.d/lcgenv.csh lcgenv.sh -> ../../external/etc/profile.d/lcgenv.sh</pre>
savannah 30390 ↗	<p>'grid-env.csh' needs '>>' instead of '>' redirection for temp files. Fix: replace '>' with '>>' manually</p>
