Master task

task description here

This is a parent task and it is used to bind together several technical subtasks listed among the

It is assigned to the task coordinator.

The effort estimated for this task is indicative and has been set based on the tables in <https://twiki.cern.ch/twiki/bin/view/LCG/PreProductionServiceDescription>

Please add a comment if you think that it should be changed

In order to correctly evaluate the effort globally spent to perform the task one should take into account the effort declared for the task itself and what declared for the connected subtasks.
