

Error

You get this :

```
$ rfdir <my_dpm_host>:/storage  
opendir(): <my_dpm_host>:/storage: Permission denied (error 13 on <my_dpm_host>)
```

Solution

To use `rfdir` with the DPM, the recipe is :

```
$ export DPNS_HOST=<my_dpns_host>  
$ rfdir /dpm/cern.ch/home/dteam/
```

Comment

To use `rfrm`, you need to set `DPM_HOST` and `DPNS_HOST` :

```
$ export DPNS_HOST=<my_dpns_host>  
$ export DPM_HOST=<my_dpm_host>  
  
$ rfrm -r /dpm/cern.ch/home/dteam/tests_sophie
```

Help !

If it still doesn't help, send the `/var/log/rfiiod/log` file to support@ggusNOSPAMPLEASE.org (remove the NONSPAM !).
