Transfer Operations

This area tracks the current status of the distributed transfer service operations. Its focus is upon CERN-PROD: tier-0 export and tier-2 services.

Tier-0 service status

Daily status

The current status, indexed by day, is tracked in [TransferOperationsDailyLog](#). This tracks current problems and open issues.

Weekly summary reports for the Joint Operations Meeting are kept at [TransferOperationsWeeklyReports](#).

Weekly summary of issues noticed on the Castor Tier-0 service are kept in [TransferOperationsWeeklyCastor](#).

Daily procedure

The procedures to check for problems on the transfer service and how they interact with the WLCG and EGEE operations are described in [TransferOperationsProcedures](#).

FTS service monitoring

Monitoring of the tier-0 export service:

Summary statistics	Daily and weekly summary statistics
CC monitoring	Computer centre monitoring (<i>gridfts</i> cluster)

Operations reference

FTS deployment and procedures on CERN-PROD

- Operations procedures for the computer centre operators are documented in [OPM](#) for the *gridfts* cluster
- Deployment layout is documented in [FtsTier0Deployment](#)
- Installation / upgrade / FAQ / etc is described from [FtsRelease20](#)
- CERN-PROD intervention plans are described in [FtsTier0ServerInterventions](#)
- Standard service manager procedures are described in [FtsProcedures20](#)

Common transfer errors

The zoo of collected gridFTP errors and the causes behind them are listed in [TransferOperationsGridFTPErrors](#) (maintained by GD and FIO groups).

Most "popular" errors

List of the most "popular" FTS errors with types and reasons [TransferOperationsPopularErrors](#).

FTS pilot service status

The current status and use of the FTS pilot service is described in TransferOperationsPilotService.

CCRC May report

Analysis of the T0-export data from FTS is in FtsCCRC08MayReport.
