VOMS Known Issues (current production)

VOMS-ADMIN

BUG #39626 (Request expiration time)

The default value for the request expiration time (the time before the unconfirmed via e-mail user membership requests are removed from the VOMS database) is not the one which is reported to the user after the submission of the registration form (i.e. 24 hours). This time can be controlled with the `voms.request.vo_membership.lifetime` variable on per a VO basis (/var/glite/etc/voms-admin//voms.service.properties configuration file).

Possible workarounds are

- edit this file for every VO configured on your server
- edit the template (/opt/glite/etc/voms-admin/templates/voms.service.properties.template) and do a reconfiguration

Fixed in VOMS-ADMIN 2.0.18 (currently in PPS)
