- ATLAS reports (raw view) -
 - ◆ T0/Central services
 - ◇ CASTOR ATLAS sls monitoring down GGUS:95485 & INC:333771. One certificate from SAM monitoring boxes got expired. Fixed. [LucaM: there were some monitoring glitches due to issues with one machine]
 - ◇ Analysis at CERN failing GGUS:95445 Failed Critical SAM test with error "File was NOT deleted from SRM. Quota reached for number of files (5M) on atlascratchdisk. 0-length files transfers failing. Files declared lost. Ongoing. [LucaM: analysed the issue with Alessandro this morning. The permissions did not allow file deletion. Should be fixed by 10am this morning, permissions now allow file deletion and overwriting in case of failures.]

 - ◇ BNL lost files. Recovery ongoing.

- CMS reports (raw view) -
 - ◆ No report
- ALICE -
 - ◆ KIT: concurrent jobs cap had to be lowered to 2k since Sat afternoon to avoid firewall overload due to off-site data access; the recurrent issues with the local SE will be the subject of a meeting foreseen for this week
- LHCb reports (raw view) -
 - ◆ Incremental stripping campaign in progress and MC productions ongoing
 - ◆ T0:
 - ◇ [LucaM: GGUS:95501 [↗](#) is now solved. There were two BestMan running.]
 - ◇ [LucaM: as discussed with Philippe, LHCb reached 95% of its EOS space, will add capacity.]
