

## Set a Brunel Job

On the lxplus machines at CERN in the *afs* directory the next steps are needed:

```
.../> cd cmtuser
.../> setenvBrunel v32r2
.../Brunel_v32r2> getpack Rec/Brunel v32r2
.../Brunel_v32r2> getpack Tr/NNTools v1r1
.../Brunel_v32r2> cd Rec/Brunel/v32r2/cmt
.../Brunel_v32r2/Rec/Brunel/v32r2/cmt> source setup.sh
.../Brunel_v32r2/Rec/Brunel/v32r2/cmt> cmt br make
```

Once the executable is produced, in the directory *.../Brunel\_v32r2/Rec/Brunel/v32r2/options/* copy the options file *\$RECSYSROOT/options/Reco.opts* and modify accordingly the *Brunel.opts* file.

Next step is to copy the file *\$TRACKSYSROOT/options/RecoTracking.opts* in same directory and modify the *Reco.opts* file.

Update the *RecoTracking.opts* file and the rest of needed options files as shown in section *Setting the Options Files for NN*.
